Tripod Classic Screen Pressured Safety Suspension

Double-Locking Safety Mechanism

UP: The stand features a pneumatic pressured suspension which allows the user to smoothly lift the screen with minimal efforts.

DOWN: When in use, the pneumatic pressured suspension will ensure the screen remains suspended even in cases where the close button is accidentally engaged. This feature prevents any accidental retractions and puts the user in full control.

U-Work Screen Series

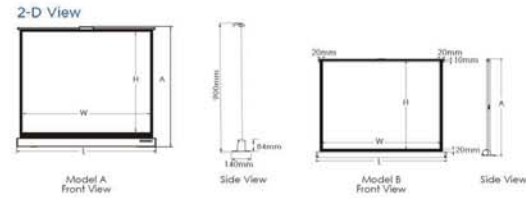

U-WORK A:40"~60"
U-WORK B:25"~40"

Anytime Anywhere

The U-Work screen provides a perfect solution for table-top presentations in business and education environments. With an innovative casing design, the weight of a 40" screen is only 1.2kg. With the carrying bag, the screen becomes even easier to transport. No installation is required and one button locking mechanism makes the screen extremely easy to operate. Turning out the base foot will unlock the screen and once the screen is pulled up by the handle it is ready to use. As the portable LED projector and mobile phones with projection capabilities are gaining popularity, the U-work screen offers an excellent viewing experience compared to the traditional laptop and brings customers a better viewing experience for portable business. The latest design of the U-Work screen with the self-standing base foot allows the screen to be stopped at any desired position.

U-Work Portable Screen
