DCN Wireless Discussion systems

Anywhere people meet

Whether the venue is large or small, multi-use or historical, the Bosch DCN Wireless Discussion System offers organizations unparalleled functionality and flexibility. The wireless system can be adjusted to meet any discussion requirement: from a basic set-up requiring no operator to a fully interactive voting arrangement with a large screen display.

Discover the possibilities...

Get down to talking in no time

Discussion

- ▶ Ultimate wireless flexibility
- ▶ Crystal clear speech intelligibility
- ▶ No battery low during meetings

Location friendly

With superb sound and speech quality of up to 20 kHz, the DCN Wireless Discussion System allows participants to speak and listen with ease. Bosch has gone to great lengths to design a system that is easy to use and adaptable to varying situations and requirements. A basic discussion unit allows delegates to talk and listen, while a dual discussion unit is a cost-effective solution which serves two delegates at a time. Chairman's functionality can easily be added to a unit to allow a chairman to overrule other delegates with the touch of a button. Featuring an award winning Wireless Access Point (WAP), this discussion system can be installed, rearranged and operated with virtually no impact on the integrity of the location.

User friendly

Removable Bosch Battery Packs are useful during multi-day sessions where batteries have to be recharged quickly and efficiently. Each compact charging unit can charge up to 5 Lithium-ion batteries at once. The specially developed Congress Control Software is highly user-friendly. Although a simple set up requires no operator, the control software provides an operator with extensive functionality: the status of each unit can be monitored and the identity of its user and many other key properties displayed.

Security friendly

It goes without saying that the quality of the signal is superb. Additionally, all signals within the DCN Wireless System are digitally protected against tapping or eavesdropping.

Let's make it interactive

Electronic voting

- ▶ **Bosch Congress Control Software:**
 - Fast tally and display of delegates votes
 - Anonymous voting possible
 - Logging of results
- ▶ **Full voting functionality**

Time to take a vote

For interactive situations where polling and voting are important, discussion units with voting functionality can be used in the DCN Wireless Discussion System. The operator can start, stop and suspend voting via the Bosch Congress Control Software on a personal computer or via a touch screen.

Displaying results

Voting results can be synoptically displayed on various kinds of screens and logged if desired. The Bosch Congress Control Software also allows for anonymous voting, displaying the total result.

Look who's talking

Camera control

- ▶ **Fast-moving dome camera to show current speaker**
- ▶ **Fixed camera to show an overview image of the venue**
- ▶ **Speaker information on screen**
- ▶ **Operator-free camera system**

Automatic camera system

The system can automatically show an image of the current speaker on monitors or projection screens in the main hall, lobby, interpreters' booths, breakout rooms or anywhere else required. Delegate information appears along with the image. For a general overview of all delegates the system can switch to fixed-angle cameras.

Camera control and configuration is automatic, so the system can be run without an operator. Bosch AutoDome® cameras are ideal for this application and especially useful when video conferencing between sites. Camera control ensures that participants always have appropriate details on the current speaker.

Tradition of quality and innovation

For over 100 years, the Bosch name has stood for quality and reliability. Bosch Security Systems proudly offers a wide range of fire, intrusion, social alarm, CCTV, management and communication systems and components to help you find the solution for any application. We are the global supplier of choice for innovative technology backed by the highest level of service and support. When you need solutions you can rely on, choose Bosch.
